

# Drive Train Options

## Choose a drive unit to fit your application.

### Valley Standard 2 Wheel

- Wide wheel base for stability on rolling and windy conditions
- Set of four braces on each side to provide stability when crossing deep ridges
- Valley flex-joint forged ball hitch assembly minimizes pipe stress on rolling terrain
- Several tire sizes available to match your field conditions

### V-3™

- 50% more traction than standard drive unit
- Available with all current tire sizes to provide increased flotation
- Heavy duty center wheel gearbox for long life
- Base beam only and conversion options available

### Spider™ Quad Drive

- All four wheels are driven with Valley Gearboxes
- Wheels articulate to conform to field terrain
- Twice the traction of a standard drive
- Twice the flotation of a standard drive
- Minimizes wheel rut depth
- Several tire sizes available

## Tracked Options

### Spider™ Dual Drive

- Provides a solution where other options have not worked
- Higher flotation and traction than regular wheel drives
- Minimizes rut depth
- Can be added to any span
- Heavy duty base beam
- Base beam only and conversion options available
- Retread tires with steel tracks for long life

### Spider™ Quad Drive with track option

- All four wheels are driven
- Tracks articulate to conform to field terrain
- Maximum traction available
- Maximum flotation available
- Minimizes wheel rut depth
- Steel tracks for long life
